

## PERSONAL PROTECTION EQUIPMENT EXPLANATION:

All of our technicians wear full Tyvek suits with gloves and booties plus full face respirators

PICTURE # 1: Moldex technicians applying anti-microbial sealer to a new home in PPE.

PICTURE # 2: We always wear full face respirators with the correct filter cartridges.

PICTURE # 3: Moldex technician working on a stucco remediation home in full PPE.

PICTURE # 4: Moldex technician soda blasting an exterior wall cavity in full PPE.

### ADDITIONAL INFORMATION AND NOTES:

Our full Personal Protection Equipment (PPE) includes complete Tyvek suits/gloves/booties and full-face respirators with special Hepa, mold filtering cartridges.

Moldex technicians perform all tear out, soda blasting operations and Hepa vacuuming remediated areas while wearing this equipment. This includes our owner, managers, lead techs, 2<sup>nd</sup> tech and hired labor. In most cases, all individuals working change suits/gloves/booties 2 to 3 times a day. Respirator filter cartridges are changed at the start of each project.
